### II. National indicator's source

<b>Data sources</b>	<ul style="list-style-type: none"> <li>■ Source: <i>National Fertility and Family Health and Welfare Survey</i></li> <li>■ Collection method: Surveys of married women aged 15-49 nationwide with a live birth in the past two years.</li> </ul>
<b>Calendar</b>	<ul style="list-style-type: none"> <li>■ Frequency: 3 years(latest survey period: Jul - Sep 2018)</li> <li>■ Data release: December in the reference year</li> </ul>
<b>Organizations</b>	Department of Population Policy Research(Tel. 044-287-8264), Korea Institute for Health and Social Affairs
<b>Related International Agency</b>	UNICEF

### III. Comparison with UN SDG indicator

	① Indicator		② Definition		③ Data value	
	Same	Different	Same	Different	Same	Different
<b>Note</b>						
<b>Global indicator link</b>						

■ Where distinctive reports on births attended by skilled health personnel are unavailable, the UN allows for using institutional births as a proxy indicator, and the WHO cites the findings from the *'National Fertility and Family Health and Welfare Survey'*.  
 ■ There are discrepancies in that the UN indicator is for multiparous women aged 15-49, whereas the local statistics are for married multiparous women aged 15-49.
