

<b>U N</b>	<b>G o a l</b>	<b>3. Ensure healthy lives and promote well-being for all at all ages</b>
	<b>T a r g e t</b>	<b>3.2 By 2030, end preventable deaths of newborns and children under 5 years of age, with all countries aiming to reduce neonatal mortality to at least as low as 12 per 1,000 live births and under-5 mortality to at least as low as 25 per 1,000 live births</b>
	<b>I n d i c a t o r</b>	<b>3.2.1 Under-5 mortality rate</b>

**I. National indicator**

&lt;Type 1&gt;

<b>Indicator</b>	Under-five mortality rate
<b>Definition</b>	Number of children dying before reaching the age of 5 years per 100,000 population
<b>Calculation method</b>	$\frac{\text{No. of deaths aged 0-4}}{\text{Mid-year residence population aged 0-4}} \times 100,000$
<b>Unit</b>	Deaths per 100,000 live births

**II. National indicator's source**

<b>Data sources</b>	<ul style="list-style-type: none"> <li>■ Source: <i>Vital Statistics</i></li> <li>■ Collection method: Death reports filed with city, district, and municipal offices (complemented with fetal and baby death reports from crematories).</li> </ul>
<b>Calendar</b>	<ul style="list-style-type: none"> <li>■ Frequency: Monthly</li> <li>■ Data release               <ul style="list-style-type: none"> <li>- Monthly population trends (birth, death, marriage, divorce): End of month (in two months after the reference month)</li> <li>- Annual births: (Provisional) end February in the following year, (confirmed) end August in the following year</li> <li>- Annual deaths: (Provisional) end February in the following year, (confirmed) end September in the following year (as part of the <i>Cause of Death Statistics</i>)</li> <li>- Annual marriages and divorces: End March in the following year</li> </ul> </li> </ul>
<b>Organizations</b>	Vital Statistics Division(Tel. 042-481-2252), Statistics Korea
<b>Related International Agency</b>	UNICEF, UN IGME(Inter-agency Group for child Mortality Estimation)

**III. Comparison with UN SDG indicator**

① Indicator	② Definition	③ Data value
Same	Different	Same
Different	Same	Different
<b>Note</b>	<ul style="list-style-type: none"> <li>■ In the local data, under-five mortality rate is calculated by counting deaths aged 0-4 separately from age-specific deaths and dividing the figure by the mid-year resident population aged 0-4, whereas by population aged 0 or births in the global data.</li> <li>■ Substituting the mid-year resident population aged 0 or the year's births for the denominator would yield a figure contiguous to the global data.</li> </ul>
