

U N	Goal	3. Ensure healthy lives and promote well-being for all at all ages
	Target	3.3 By 2030, end the epidemics of AIDS, tuberculosis, malaria and neglected tropical diseases and combat hepatitis, water-borne diseases and other communicable diseases
	Indicator	3.3.1 Number of new HIV infections per 1,000 uninfected population, by sex, age and key populations

I. National indicator

<Type 1>

Indicator	Number of new HIV infections
Definition	The annual number of new HIV infections
Calculation method	The number of new HIV infections among residents
Unit	Number of Cases

II. National indicator's source

Data sources	<ul style="list-style-type: none"> ■ Source: (HIV/AIDS) <i>Annual Report on Notified Cases</i> ■ Collection method: Compiling reports from medical institutions(including public health centers), which should be filed with the integrated diseases and health management system within 24 hours whenever they give diagnosis and/or treat HIV/AIDS patients.
Calendar	<ul style="list-style-type: none"> ■ Frequency: Annually (Jan 1 - Dec 31 of the reference year) ■ Data release: June in the following year
Organizations	Division of HIV/AIDS Prevention and Control(Tel. 043-719-7331), Korea Disease Control and Prevention Agency
Related International Agency	UNAIDS, OECD

III. Comparison with UN SDG indicator

	① Indicator		② Definition		③ Data value	
	Same	Different	Same	Different	Same	Different
Note	<ul style="list-style-type: none"> ■ National data of Korea are not included in the UN global data. The Korea Disease Control and Prevention Agency compiles and publishes statistics on HIV infections annually based on reports from medical institutions. ■ To produce statistics as per the SDG indicator's definition, the annual infections counted by the Korea Disease Control and Prevention Agency should be divided by the number of non-infected population of the year (total population - aggregate infections).
