U N	목 표	3. Ensure healthy lives and promote well-being for all at all ages
	세부목표	3.8 Achieve universal health coverage, including financial risk protection, access to quality essential health-care services and access to safe, effective, quality and affordable essential medicines and vaccines for all
	Indicator	3.8.1 Coverage of essential health services

I. Global indicator

⟨Type 2⟩

Indicator	Coverage of essential health services
Definition	An index reported on a scale of 0 to 100, which is computed as the geometric mean of 14 tracer indicators of health service coverage.

II. Data description

[Data] Coverage of essential health services

Calculation method	The 14 tracer indicators are first all placed on the same scale, with 0 being the lowest value and 100 being the optimal value (see the UN metadata). Geometric means are computed within each of the four health service areas, and then a geometric mean is taken of those four values.
Unit	-
Data sources	Indicator 1. Family planning: Population-based health surveys Indicator 2. Pregnancy and delivery care: Household surveys and routine facility information systems. Indicator 3. Child immunization: Household surveys and facility information systems Indicator 4. Child treatment: Household surveys Indicator 5. Tuberculosis treatment: Facility information systems, surveillance systems, population-based health surveys Indicator 6. HIV/AIDS treatment: Facility reporting systems, sentinel surveillance sites, population-based surveys Indicator 7. Malaria prevention: Household surveys Indicator 8. Water and sanitation: Household-level responses Indicator 9. Prevention of cardiovascular disease: Population-based surveys and surveillance systems Indicator 10. Management of diabetes: Population-based surveys and surveillance systems Indicator 11. Tobacco control: Household surveys Indicator 12. Hospital access: Administrative systems, Health facility reporting system Indicator 13. Health workforce: National database or registry of health workers, ideally coupled with regular assessment of completeness using census data, professional association registers, or facility censuses. Indicator 14. Health security: Key informant survey
Calendar	▌Time series: 2000, 2005, 2010, 2015, 2017(All data for Korea are included) ▌Data release: Vary by tracer indicator(1-5 years)
Data compilers	WHO(World Health Organization)
