

U N	Goal	3. Ensure healthy lives and promote well-being for all at all ages
	Target	3.a Strengthen the implementation of the World Health Organization Framework Convention on Tobacco Control in all countries, as appropriate
	Indicator	3.a.1 Age-standardized prevalence of current tobacco use among persons aged 15 years and older

I. National indicator

<Type 1>

Indicator	Current tobacco use
Definition	The percentage of population aged 19 years and over who have ever consumed five packs of tobacco or more and currently use any tobacco product
Calculation method	$\text{Adults' current tobacco use} = \frac{\text{Adults aged 19 and over who have ever consumed five packs of tobacco (100 sticks) and currently use any tobacco product on a daily or non-daily basis}}{\text{Projected population}} \times 100$
Unit	Percent (%)

II. National indicator's source

Data sources	<ul style="list-style-type: none"> ■ Source: <i>Korea National Health and Nutrition Examination Survey</i> ■ Collection method: Survey of nationwide household members aged 19 and over
Calendar	<ul style="list-style-type: none"> ■ Frequency: Annually(Jan 1 - Dec 31 of the reference year), year-round(48 weeks a year) ■ Data release: December in the following year
Organizations	Health and Nutrition Examination Survey Division(Tel. 043-719-7467), Korea Disease Control and Prevention Agency
Related International Agency	OECD, WHO

III. Comparison with UN SDG indicator

	① Indicator		② Definition		③ Data value	
	Same	Different	Same	Different	Same	Different
Note						
Global indicator link						

■ The global data is age-normalized according to the WHO reference population for comparison between countries. The current tobacco use in the '*Korea National Health and Nutrition Examination Survey*' represents the percentage of population aged 19 years and over who have ever consumed five packs of tobacco or more and currently use any tobacco product
 * The current tobacco use in population aged 13-18(1st grade of the middle school to 3rd grade of the high school) is measured in the *Korean Youth Health Behavior Survey*
 ⇨ *Korean Youth Health Behavior Survey*: Anonymous, self-recorded online survey (conducted in computer rooms in schools) of students ranging from 1st grade of the middle school to 3rd grade of the high school in 800 sample schools nationwide
