

U N	G o a l	6. Ensure availability and sustainable management of water and sanitation for all
	T a r g e t	6.b Support and strengthen the participation of local communities in improving water and sanitation management
	I n d i c a t o r	6.b.1 Proportion of local administrative units with established and operational policies and procedures for participation of local communities in water and sanitation management

I. Global indicator

<Type 4>

Indicator	Proportion of local administrative units with established and operational policies and procedures for participation of local communities in water and sanitation management
Definition	<p>This indicator is defined as the proportion of local administrative units with established administrative policies and procedures for meaningful contribution by individuals and communities to the orientations of and decisions on water and hygiene management.</p> <p>The indicator proportion of local administrative units with established and operational policies and procedures for participation of local communities in water and sanitation management is measured by the proportion of countries with clearly defined procedures in law or policy for participation by service users/communities in planning program in water and sanitation management, and hygiene promotion and the Proportion of countries with high level of users/communities participating in planning programs in water and sanitation management, and hygiene promotion.</p> <p>Local administrative units refers to non-overlapping sub-districts, municipalities, communes, or other local community-level units covering both urban and rural areas to be defined by the government. Policies and procedures for participation of local communities in water and sanitation management would define a formal mechanism to ensure participation of users in planning water and sanitation activities.</p>
