I. Global indicator

<Type 4>

Indicator	Tourism direct GDP as a proportion of total GDP and in growth rate
Definition	<p>Tourism GDP as a proportion of total GDP.</p> <p>Tourism Direct GDP is defined as the sum of the part of gross value added (at basic prices) generated by all industries in response to internal tourism consumption plus the amount of net taxes on products and imports included within the value of this expenditure at purchasers' prices.</p> <p>The value of the economic contribution of tourism captured by this indicator, and increases or decreases in it, could indicate the degree to which tourism is being successfully promoted. This indicator is useful for policy on tourism at national level as it gives a more inclusive measure of the economic contribution of tourism.</p>
