

U N	Goal	9. Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation
	Target	9.2 Promote inclusive and sustainable industrialization and, by 2030, significantly raise industry's share of employment and gross domestic product, in line with national circumstances, and double its share in least developed countries
	Indicator	9.2.2 Manufacturing employment as a proportion of total employment

I. National indicator

<Type 1>

Indicator	Manufacturing employment as a proportion of total employment
Definition	The proportion of manufacturing employment in total employment. The total employment is based on industry-specific employment data in the Economically Active Population Survey
Calculation method	$\frac{\text{Manufacturing employment}}{\text{Total employment}} \times 100$
Unit	Percent (%)

II. National indicator's source

Data sources	<ul style="list-style-type: none"> ■ Source: <i>Economically Active Population Survey</i> ■ Collection method: Interviews with 35,000 households nationwide on their employment, unemployment, labor force, etc
Calendar	<ul style="list-style-type: none"> ■ Frequency: Monthly(data as of the week to which the 15th day of the month belongs) ■ Data release: The following month
Organizations	Employment Statistics Division(Tel. 042-481-2266), Statistics Korea
Related International Agency	OECD, ILO

III. Comparison with UN SDG indicator

	① Indicator	② Definition	③ Data value
Same	Different	Same	Different
Note	<ul style="list-style-type: none"> ■ The local data underwent retrospective correction for past time series(July 2000 - December 2017) on February 14 2018; the UN SDGs used pre-correction data
