

U N	G o a l	11. Make cities and human settlements inclusive, safe, resilient and sustainable
	T a r g e t	11.3 By 2030, enhance inclusive and sustainable urbanization and capacity for participatory, integrated and sustainable human settlement planning and management in all countries
	I n d i c a t o r	11.3.1 Ratio of land consumption rate to population growth rate

I. Global indicator

<Type 4>

Indicator	Ratio of land consumption rate to population growth rate
Definition	<p>The ratio of land consumption rate to population growth rate in a given period of time.</p> <p>Globally, land cover is altered by various human activities. On average urban land cover has grown more than three times as much as the urban population on average. Given the significant increases in land use, population growth and land consumption rates should be measured to ensure effective land management.</p>
