

<b>U N</b>	<b>G o a l</b>	<b>11. Make cities and human settlements inclusive, safe, resilient and sustainable</b>
	<b>T a r g e t</b>	<b>11.3 By 2030, enhance inclusive and sustainable urbanization and capacity for participatory, integrated and sustainable human settlement planning and management in all countries</b>
	<b>I n d i c a t o r</b>	<b>11.3.2 Proportion of cities with a direct participation structure of civil society in urban planning and management that operate regularly and democratically</b>

**I. Global indicator**

&lt;Type 4&gt;

<b>Indicator</b>	Proportion of cities with a direct participation structure of civil society in urban planning and management that operate regularly and democratically
<b>Definition</b>	<p>This indicator measures the progress of policy makers and urban managers and planners to integrate resident and civil society participation in urban planning and management at various levels.</p> <p>The development of sustainable human settlements calls for the active engagement of all key stakeholders with particular attention to project/programme beneficiaries and vulnerable groups. Civil society and public participation fosters a positive relationship between government and the public by communicating effectively and solving the conflicts in a cooperative manner.</p> <p>When urban planning decisions are made without consultation, the desired results are not achieved and there is a negative impact on society, due to inefficient allocation and use of resources. This has broader implications for building an active, inclusive and equitable society and more inclusive and sustainable urban environments.</p>
