

U N	G o a l	11. Make cities and human settlements inclusive, safe, resilient and sustainable
	T a r g e t	11.b By 2020, substantially increase the number of cities and human settlements adopting and implementing integrated policies and plans towards inclusion, resource efficiency, mitigation and adaptation to climate change, resilience to disasters, and develop and implement, in line with the Sendai Framework for Disaster Risk Reduction 2015-2030, holistic disaster risk management at all levels
	I n d i c a t o r	11.b.2 Proportion of local governments that adopt and implement local disaster risk reduction strategies in line with national disaster risk reduction strategies

I. Global indicator

<Type 2>

Indicator	Proportion of local governments that adopt and implement local disaster risk reduction strategies in line with national disaster risk reduction strategies
Definition	The Sendai Framework for Disaster Risk Reduction 2015-2030 was adopted by UN Member States in March 2015 as a global policy of disaster risk reduction. One of the targets is: “Substantially increase the number of countries with national and local disaster risk reduction strategies by 2020”. In line with the Sendai Framework for Disaster Risk Reduction 2015-2030, disaster risk reduction strategies and policies should mainstream and integrate disaster risk reduction within and across all sectors, across different timescales and with targets, indicators and time frames. These strategies should be aimed at preventing the creation of disaster risk, the reduction of existing risk and the strengthening of economic, social, health and environmental resilience. Member States count the number of local governments that adopt and implement local DRR strategies in line with the national strategy and express it as a percentage of the total number of local governments in the country.

II. Data description

[Data] Proportion of local governments that adopt and implement local disaster reduction strategies in line with national disaster risk reduction strategies

Calculation method	$\frac{\text{Number of local governments that adopt and implement local disaster risk reduction strategies in line with national disaster risk reduction strategies}}{\text{Number of local governments}} \times 100$
Unit	Percent (%)
Data sources	Reported by individual countries’ ministries, statistical services, and other authorities to the UNISDR.
Calendar	<ul style="list-style-type: none"> ■ Time series: 2015-2019(Data for Korea included in 2015-2018) ■ Data release: Annually
