### III. Comparison with UN SDG indicator

	① Indicator		② Definition		③ Data value	
	Same	Different	Same	Different	Same	Different
<b>Note</b>	<ul style="list-style-type: none"> <li>■ The definition of physical violence for the purpose of the UN indicator refers to explicit actions, but the national survey does not specifically provide the definition of the 'violence' concept. For sexual violence, the UN indicator includes violence without physical contact, but the local survey only counts sexual violence involving physical contact</li> <li>■ There is no consensus on the agreed concept of emotional violence in the UN level; a locally corresponding indicator should be defined as international society reaches consensus on the agreed concept</li> </ul>
