

U N	<b>G o a l</b>	<b>16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels</b>
	<b>T a r g e t</b>	<b>16.7 Ensure responsive, inclusive, participatory and representative decision - making at all levels</b>
	<b>I n d i c a t o r</b>	<b>16.7.2 Proportion of population who believe decision-making is inclusive and responsive, by sex, age, disability and population group</b>

### I. National indicator

&lt;Type 3&gt;

<b>Indicator</b>	People's political efficacy about what governments do
<b>Definition</b>	External efficacy of an individual's political efficacy about what governments work. the extent to which people think that governments will listen to, and act on, the opinions of ordinary citizens. In other words, this indicator measures people's trust in compensation for significant participation.
<b>Calculation method</b>	Respondents are asked the question "do you agree to this statement, the government does not allow people like me to have an influence on what the government does" and provide a rating of 5 points (1=Do not agree at all, 5=Absolutely agree), and the average score of the respondents' answers is calculated.
<b>Unit</b>	Index

### II. National indicator's source

<b>Data sources</b>	<ul style="list-style-type: none"> <li>■ Source: Social Integration Survey</li> <li>■ Collection method: Interviews(accompanied by self-reported questionnaire)</li> </ul>
<b>Calendar</b>	<ul style="list-style-type: none"> <li>■ Frequency: Annually(Survey done in Sep 1 - Oct 31)</li> <li>■ Data release: End of January in the following year</li> </ul>
<b>Organizations</b>	Center for Social Survey(Tel. 02-2007-0663), Korea Institute of Public Administration
<b>Related International Agency</b>	N/A

### III. Comparison with UN SDG indicator

	① Indicator		② Definition		③ Data value	
	Same	Different	Same	Different	Same	Different
<b>Note</b>	<ul style="list-style-type: none"> <li>■ The National indicator is in line with the UN indicator in that it measures external efficacy as political efficacy. However, the UN recommends using the question "how much would you say the political system in [country X] allows people like you to have a say in what the government does?" and provides a similar question "how much would you say that the political system in [country] allows people like you to have an influence on politics?"</li> <li>■ The question used for the national indicator is described in a negative statement. KOSIS releases the average score of answers to this negative statement, and the Korea Institute of Public Administration recalculates the results by converting the negative statement to a positive statement, hence difference between data reported by KOSIS and the Korea Institute of Public Administration.</li> </ul>
