I. Global indicator

<Type 4>

Indicator	Developing countries' and least developed countries' share of global exports
Definition	<p>Exports by developing countries and LDCs as a share of global exports of goods and services</p> <p>This indicator allows tracking the increase of exports from developing countries and LDCs and information on the relative size of Developing and LDCs export in comparison to global exports.</p> <p>Export shares need to be analysed from different angles in order to infer whether a particular country or region made improvements in its trade performance.</p> <p>Exports value should be always kept into account in order to observe whether changes in export shares are originating from increasing developing and LDCs exports or from a decrease of other countries exported values.</p>
